Centricity Universal Viewer Zero Footprint (ZFP) can be accessed via an iPad. This job aid provides information for image display and manipulation on the iPad. ZFP via an iPad, as with the ZFP client, is not for diagnostic use. It is a review-only offering.

For detailed information please refer to the Universal Viewer Zero Footprint Client – iPad version Operator Manual.

**Ambient Light Test**

The first time you launch ZFP on the iPad or upon moving to a new environmental lighted condition you should perform the following ambient light test.

1. On the toolbar, tap the Ambient Light Test icon 📊
   The Light Test page displays with information about the ambient light User Assessment and information about the test.
2. After reading the information on the Light Test page, tap Perform Light Test.
3. When the TG18-CT pattern displays, verify that you can see an image of a half-moon in each of the 16 luminance regions.
4. After you are successful, either:
   a. Swipe from right to left.
   b. Tap TG18-MP in the top right corner of the screen.
5. When the TC18-MP pattern displays, verify that you can clearly distinguish between the successive grayscale bands.
6. After you are successful, tap Done.
   A confirmation messages displays requesting you confirm the test results.
7. If you select Yes, the ZFP client - iPad version - launches.
   If you select No, the Ambient Light Test application instructs you to find more suitable ambient lighting.
iPad Finger Gestures

In addition to tap gestures to interact with the icons and menus, finger gestures are also supported when accessing ZFP via an iPad.

<table>
